INTRODUCTION AND CONTACT INFO

Introduction
This document explains the firmware releases done for the Avonic CamDirector® CD500 and Teacher Tracker software. It contains different release versions that correspond with the versions mentioned under System > Status > Firmware in the WebInterface. In this document is described what is new to the firmware and what changes are made to the firmware. There is also a history of the firmware changes started with the (date) of the latest release and followed by older ones. For the firmware itself, please click the check for updates button in the WebInterface. See How to update the firmware. For (other) documentation see the product website of the CD500 and Teacher Tracker software.

HOW TO UPDATE THE FIRMWARE

Follow the instructions below to upgrade the firmware:
1. Go to the WebInterface of the CamDirector® Teacher Tracker.
2. Navigate to the Settings/status tab.
3. Click the "Check for updates" button down on the page.
4. If there is a update available, you can click the "update now" button.
CHANGES AND NEW FEATURES

Firmware releases

1.07 Release: Sep 06, 2022
• Fixed an issue where the TeachTracker wasn’t switched off when re-calibrating the system.
• Minor config adjustments.
• Fixed an issue where calibration wasn’t stopped when going to the previous page.
• Improved initial follow camera positioning.

1.05 Release: Jul 21, 2022
• Fixed an issue where the first step of the calibration failed on longer distances.
• Solved an issue with the Check for Updates button which gave inconsistent messages.
• Changed the default focus mode for the cameras connected to the CamDirector.
• Added an API for remote control of the CamDirector.

1.0.4 Release: Jul 12, 2022
• Fixed the issue where the webserver would crash after clicking ‘Check for Updates’.
• Added feature where the Teacher Tracker itself determines the Zoom level of the follow camera, for consistency.
• General improvements and tweaks.

1.0.3 Release: Jul 7, 2022
• Fixed an issue where the Teacher Tracker kept switching back and forth between Overview and Follow camera with no good reason.
• Adjusted some textual inconsistencies in the WebInterface.

1.0.2 Release: Jul 1, 2022
• Fixed an issue where the MAC address was wrongly displayed.
• General improvement in the licence management.
• Fixed the issue where the device did not get a Fallback IP address if set to DHCP without a DHCP server present.
• General bug fixes.
